Special Instructions:

Yes I have read
the following text:

The decals on the reverse were originally devised as a means of raising funds to create master soap molds so that gay couples could celebrate their commitment with wedding favors as any other married couple has the opportunity to do.

Secondly, but more importantly, they are seen as a very affordable way of allowing the general public a tasteful means of expressing displeasure with the current laws in place preventing same sex couples of consenting age the right to marry in the US. Just as slavery should never have been left up to each state neither should gay marriage; justice is not always popular.

We at PJ Soaps want to make sure these stickers are affordable for everyone and we simply ask that they not be priced more than \$5 each retail, and if possible less. The goal is to have every single sticker used and visible in every state in the union. Please explain to customers that it is the face of the decal that is sticky and is meant to go on the inside of shop, home and/or auto windows.

You may also place your order securely online at www.pjsoaps.com

Sincerely,
CEO, PJ Soaps
